INHALATION: Remove to fresh air. If breathing is irregular seek medical advice.

INGESTION: Obtain immediate medical attention. Induce vomiting only if indicated by the doctor. Never give anything by mouth to an unconscious person.

5. Fire-fighting measures

CARDURA

Not classified as flammable but burns

Dangerous combustion products: carbon monoxide.

Not suitable extinguish measures: jets of water.

6. Accidental release measures

Extinguish the sources of ignition or heat; cover the spillage with inert absorbent material. Collect as far as possible the resulting mass and discard the remainder by spraying water, if not contraindicated.

For information on environmental and health risks, protection of the respiratory airways, ventilation and individual protective measures refer to the other sections of this sheet.

7. Handling and storage

Store in a well ventilated place keeping the containers closed when not used. Do not smoke while handling. Keep far away from sources of heat, naked flames and sparks and other sources of ignition; do not spray in the vicinity of flames or incandescent materials.

For information on environmental and health risks, protection of the respiratory airways, ventilation and individual protective measures refer to the other sections of this sheet.

8. Exposure controls/personal protection.

In order to minimize exposure as far as possible, it is strongly recommended to use adequate individual protective measures such as: masks suitable for the product, goggles, gloves and overalls. Do not eat, drink or smoke while handling it. Accurately wash the hands with soap and water before meals and at the end of the work shift.

10. Stability and reactivity

The product is stable in normal conditions of use and storage. Due to thermal decomposition or in the event of a fire vapours may be produced potentially dangerous to health.

11. Toxicological information

Acute effects: stinging eyes. Symptoms may include rubescence, edema, pain and lachrymation. Contact with skin may cause irritation, erythema, edema, dryness and chapped skin. Vapour inhalation may slightly irritate the upper respiratory tract. Ingestion may cause health disorders, including stomach pain and sting, nausea and sickness.

Upon contact with skin, this product causes sensitization (dermatitis). Dermatitis derives from skin irritation on the areas which repeatedly come into contact with the sensitizing agent. Skin lesions may include erythema, edema, papules, vesicles, pustules, scurves, ulcerations and exudative phenomena, whose intensity varies according to illness seriousness and affected areas. Scuffy skin, dryness, ulcerations and skin thickening prevail during the acute phase.

CARDURA

Acute oral toxicity: Low toxicity, LD50>2000 mg/Kg

Acute inhalation toxicity: Low toxicity, LC50>5mg/L

Acute skin toxicity: Low toxicity, LD50>2000 mg/Kg

Skin irritation: Not irritating

Eyes irritation: Slight irritating, but not enough to request EC classification

Skin sensitizing: Sensitizing to skin

Chronic toxicity: Repeated exposure do not cause significant toxic effects.

Mutagenicity: Positive result in "in vitro" tests, but negative in "in life" tests

12. Ecological information

TOXIC TO AQUATIC ORGANISMS, MAY CAUSE LONG-TERM ADVERSE EFFECTS IN THE AQUATIC ENVIRONMENT.

EPOXY RESINS

Avoid penetration into underground.

Do not empty into drains.

Do not contaminate surface water.

CARDURA

Toxic to aquatic organisms. May cause long-term adverse effects in the aquatic environment.

Mobility: floats on water

Is absorbed by earth and is not mobile

Persistence/degradability: not easily bio-degradable

Intrinsically bio-degradable

Oxidizes quickly in air because of photochemical reactions

Bio-accumulation: has bio-accumulation potential

Acute toxicity - fishes: toxic, $1 < LC/EC/IC 50 \leq 10 \text{ mg/L}$

Acute toxicity - invertebrates: toxic, $1 < LC/EC/IC 50 \leq 10 \text{ mg/L}$

Acute toxicity - algae: toxic, $1 < LC/EC/IC 50 \leq 10 \text{ mg/L}$

Sewage treatment: it is considered practically not toxic, $LC/EC/IC 50 > 100 \text{ mg/L}$

13. Disposal considerations

Consider the possibility of burning the product in a suitable incinerator. Acid or basic products must always be neutralized before undergoing any treatment, including biological treatment whenever feasible. If the waste is solid, it can be disposed of in a landfill.

14. Transport information

These goods must be transported by vehicles authorized to the carriage of dangerous goods according to the provisions set out in the current edition of the Code of International Carriage of Dangerous Goods by Road (ADR) and in all the applicable national regulations. These goods must be packed in their original containers or in containers made of materials resistant to their content and not reacting dangerously with it. People loading and unloading dangerous goods must be trained on all the risks deriving from these substances and on all actions that must be taken in case of emergency situations.
